

Listing of the claims

1. Claim 1 is cancelled.
2. (new) For use with a vacuum cleaner having an intake nozzle, a receptacle and a blower that creates a flow from the nozzle to the receptacle so as to carry dirt from the nozzle into the receptacle, a scented and custom treated card comprising:
 - a. a card formed from a material capable of absorbing a fragrance; and
 - b. oil containing at least one of a fragrance, an anti-bacterial agent and an odor eliminator disposed on said card wherein said card is adapted to be cut into a plurality of strips which can then be bent at their centers so that said strips do not stick to the side of the receptacle, thereby increasing airflow across the surface area of said strips when said strips are inserted into the receptacle through the opening of the receptacle.
